DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. While the specification in the current invention contains a section entitled "Description of the preferred embodiments", this section describes only the advantages of the current invention over the prior art and explains those advantages in detail. No descriptions, flow charts, or graphics were presented which could enable one skilled in the art to make or use the invention without undue experimentation.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Regarding claims 1 and 10, the phrase "such as" renders the claims indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

4. The phrase "a user function, where human intervention with the OMI system is provided, said human intervention providing abilities to either submit data to the OMI system or by

providing abilities to extract data from OMI system..." is confusing and should be re-written to allow easier readability.

5. The phrase "typically and preferably" renders the claims indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

6. Claims 2-9 and 11-20 are rejected as dependant upon rejected claims 1 and 10.

7. Claims are not further treated on the merits because examiner cannot make an assessment as to which elements of the claims are intended to be limitations.

Conclusion

Prior art found in examiners search is cited as being pertinent to the patentability of the current invention. U.S. Patent No. 5,463,555 to Ward et al and U.S. Patent No. 6,345,259 to Sandoval are specifically mentioned as art directly relating to the current invention.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and to the state of the art at the time of invention.
